MAY 1 6 1963

UNITED STATES DEPARTMENT OF AGRICULTURE AGRICULTURAL RESEARCH SERVICE PLANT QUARANTINE DIVISION WASHINGTON 25, D.C.

LIST OF INTERCEPTED PLANT PESTS, 1962

(Pests Recorded From July 1, 1961, Through June 30, 1962)

Compiled by Bessie C. Mumford Plant Quarantine Aid

INTRODUCTION

This 49th interception list summarizes records of plant pests found in, on, or with plants, plant products, baggage, cargo, mail, and means of conveyance (1) imported into or entering the United States or its possessions, (2) offered for entry but refused, (3) in quarters and stores of planes and ships, (4) offered for entry for immediate transportation and exportation in bond, (5) in domestic shipments to the mainland from the States of Alaska and Hawaii, the American Virgin Islands, the Commonwealth of Puerto Rico, Guam, and other offshore possessions, or (6) in preclearance inspection in the Bahamas and Bermuda.

The pests listed include insects, mites, snails, bacteria, fungi, nematodes, and viruses of known or potential plant quarantine significance to the United States. Some common organisms are included if they are new to the country of origin or the host plant or are of limited

distribution in this country.

The data for this list include identifications received during the fiscal year 1962 and represent some interceptions made during previous years, since occasionally determinations are delayed because of heavy work loads or lack of specialists for certain types of organisms. Most identifications are made by specialists of the Entomology Research Division, the Plant Quarantine Division (both of the U.S. Department of Agriculture), and the U.S. National Museum, although collaborating State officials identify many pests intercepted in California. Snail identifications are made by taxonomists in the Division of Mollusks of the U.S. National Museum. Some critical studies and determinations are made by specialists of the Crops Research Division. Many host plants are identified by workers in the Department of Botany of the Smithsonian Institution.

Scientific names of insects and diseases are reviewed by specialists of the Plant Quarantine Division, who also assist in preparing the list. Nematode names are checked in Nematology Investigations and host names are reviewed in the New Crops Research Branch. Every effort is made to conform to the International Rules of Nomenclature.

However, in the disease tabulation the name of the stage found is often listed rather than the perfect stage. Family names are listed with the insects in the tabulation and orders are shown in the host list. Classes of the diseases are given in the disease host list.

Pests determined only to family are not usually recorded unless they are fruit flies, new species, or of some special significance. Snails not

identified to species are not recorded.

NOTES ON PESTS INTERCEPTED

The total number of interceptions for the fiscal year 1962 was 33,033, as compared with 25,575 the previous year. This does not include certain common pests which are widespread in this country and are no longer recorded. Of the total, 10,921 were considered important enough to be reported in this list. This figure includes the incompletely determined pests which were significant.

Airborne Material

Interceptions of pests arriving by air totaled 10,005, of which 8,625 were insects or snails and 1,380 were diseases or nematodes. were 311 interceptions of significant insects found as stowaways on airplanes. Among the important pests arriving by air were 27 interceptions of the European cherry fruit fly, 105 of the Mediterranean fruit fly, 7 of the Mexican fruit fly, 34 of the olive fruit fly, 15 of the oriental fruit fly, 29 of the pink bollworm, 119 of the West Indian fruit fly, 224 of the black spot of citrus, 112 of citrus canker, 78 of the sweet orange scab, and 35 of the golden nematode.

FRUIT FLIES

A total of 473 fruit fly interceptions were identified to species as follows:

Anastrepha ludens, the Mexican fruit fly, was intercepted 76 times; 75 were from Mexico and 1 from Guatemala. The hosts were grapefruit, lime, mango, pear, quince, sour orange, sweet orange, and white sapote.

Anastrepha mombin praeoptans, the West Indian fruit fly (145 times), in guava,

mango, purple mombin, rose-apple, sweet orange, tropical almond, and yellow mombin from Barbados, British Honduras, Costa Rica, Curacao, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, and Venezuela.

Anastrepha serpentina (3 times) in mamey sapote and sapodilla in air baggage

from El Salvador.

Anastrepha suspensa (3 times) in guava in air baggage from Jamaica and bag-

gage from Puerto Rico.

gage from Puerto Rico.

Ceratitis capitata, the Mediterranean fruit fly (140 times), in apple, Arabian coffee berry, Cattley guava, Coffea sp. berry, fig, grape, grapefruit, lemon, loquat, Mandarin orange, mountainash fruit, nectarine, peach, pear, pepper, persimmon, plum, pomegranate, pricklypear, quince, rosaceous fruit, sweet orange, and tropical almond. Countries of origin were Argentina, Azores, Brazil, Cyprus, Greece, Hawaii, Israel, Italy, Lebanon, Portugal, Spain, Turkey, United Arab Republic, and an unknown origin. C. capitata(?)(10 times) in Arabian coffee berry, Coffea sp. berry, grapefruit, kaki persimmon, pummelo, screwpine lei, and sweet orange from Argentina, Ethiopia, Hawaii, Italy, Peru(?), and Spain.

Ceratitis colae (once) in Coffea sp. berry in airmail from Ethiopia.

Dacus dorsalis, the oriental fruit fly (20 times), in banana, breadfruit, guava, mango, orange-jasmine fruit, papaya, and tropical almond from Guam, Hawaii, and the Philippines. D. dorsalis(?)(3 times) in guava, Malay-apple, and tropical almond from Hawaii and an unknown origin.

almond from Hawaii and an unknown origin.

Dacus oleae, the olive fruit fly (43 times), in olive in air baggage and baggage from Cyprus, Italy, Lebanon, Spain, and Syria.

Rhagoletis cerasi, the European cherry fruit fly (28 times), in cherry in air baggage, air stores, and stores from Czechoslovakia, France, Germany, Italy, Spain, and an unknown origin.

Toxotrypana curvicauda (once) in papaya in aircargo from Puerto Rico.

INSECTS OTHER THAN FRUIT FLIES

The following insect interceptions are of particular significance:

Acrolepia assectella (Hyponomeutidae) in leek in stores from Denmark, France, Italy, Netherlands, Norway, and Spain; with miscellaneous stores from France; and in onion in air baggage from France.

Adoretus sinicus (Scarabaeidae) as stowaway on airplane, on copperleaf plant,

baggage, flowers, mango, and orchid in air baggage from Hawaii.

Adoxophyes reticulana (= A. orana) (Tortricidae) on cut lilac in aircargo from

the Netherlands.

Aleurocanthus woglumi (Aleyrodidae), the citrus blackfly (10 times), on Citrus sp. leaf in air baggage from Ecuador and baggage and cargo from Mexico, on lime leaf in baggage and cargo from Mexico, and on sweet orange leaf in baggage from

Aleurotrachelus camelliae (Aleyrodidae) on camellia leaf in airmail from Japan.

Ancylostomia stercorea (Phycitidae) in bean, on bromeliad leaf, in chickpea,
pea, and pigeonpea. Countries of origin were the Canal Zone, Dominican Republic, Ecuador, El Salvador, Haiti, Jamaica, Mexico, Panama, St. Kitts, St. Martin, and Tortola.

Arge similis (Argidae) on Rhododendron sp. cutting and torch azalea plant in

airmail from Japan.

Argyresthia conjugella (Hyponomeutidae) in apple in air baggage from Norway and the Union of Soviet Socialist Republics and in mountainash berry in air baggage from England, Norway, and Scotland.

Aspidiolus destructor (Coccidae) on arrowroot leaf in airmail from Panama; on

coconut in air baggage from the Bahamas, baggage from the American Virgin Islands, Costa Rica, Nicaragua, and Panama, quarters from the Cayman Islands, and stores from Costa Rica; on kentia palm leaf in stores from Japan; on plum in baggage from Mexico; and on tropical almond in baggage from Jamaica.

Austrotortrix postvittana (Tortricidae) in airplane from New Zealand. Blastodacna atra (Cosmopterigidae) in apple in air stores from an unknown

origin and in baggage from Poland.

Brachycerus albidentatus (Curculionidae) in garlic in baggage from Italy. Bruchus tristis (Bruchidae) in grass peavine seed in baggage from Italy and in lupine seed in air baggage from the Azores.

Cacoecimorpha pronubana (Tortricidae) on cut carnation in airmail from an unknown origin, on miscellaneous plant material in aircargo from France. and on pomegranate in air baggage and baggage from Italy.

Carposina niponensis (Carposinidae) in apple in air stores, quarters, and stores

and in pear in air baggage from Japan.

Ceroplastes rubens (Coccidae) on cibotium fern in mail from Hawaii, on maile alyxia leaf in baggage from Hawaii, and on polypody fern in air baggage from Tahiti.

Chilo suppressalis (Crambidae), the Asiatic rice borer (18 times), with aircargo from Japan and in rice straw in air baggage from Japan and Spain, baggage from the Philippines, Spain, and an unknown origin, and in cargo, mail, and stores from Japan.

Cladius pectinicornis (Tenthredinidae) on cut roses in air baggage from Denmark, England, and Germany and air stores from the Netherlands; on rose cutting in air baggage from England; and in soil with holly plant in baggage from Switzer-

land.

Coccus viridis (Coccidae) (151 times) on Alpinia purpurata, alstonia leaf, Arabian coffee berry, Brazil peppertree, Citrus sp. leaf, frangipani, gardenia, ixora, lime-berry leaf, and tuberose from Fiji, Hawaii, New Guinea, and Tahiti. Conotrachelus aguacatae (Curculionidae) (11 times) in avocado in baggage from

Mexico.

Coptotermes testaceus (Rhinotermitidae) in jacaranda log in cargo from Brazil. Cryptoblabes gnidiella (Phycitidae) in grape in air baggage from Italy; in pomegranate in air baggage from France, Israel, and Italy and baggage from Greece and Italy; and in sweet orange in aircargo from Italy, air stores from Spain and an unknown origin, and stores from Spain.

Cryptophlebia leucotreta (Olethreutidae) in Arabian coffee in mail from Ethiopia and in sweet orange in stores from the Republic of South Africa.

Curculio elephas (Curculionidae) (121 times) in chestnut in air baggage, baggage, cargo, and mail from Greece, Italy, Portugal, Spain, and Yugoslavia; in cork oak seed in mail from Spain; and in oak seed in air baggage from Italy.

Cylas formicarius elegantulus (Curculionidae) in sweetpotato in air baggage from Cuba, Dominican Republic, and Haiti(?), baggage from Antigua, cargo from the Dominican Republic, quarters from Trinidad, and stores from Cuba, Dominican Republic, and Venezuela.

Cylas puncticollis in sweetpotato in cargo from Sierra Leone.

Dialeurodes kirkaldyi (Aleyrodidae) on Arabian jasmine leaf in air baggage, baggage, and mail from Hawaii; on gardenia leaf in air baggage from Tahiti; and on jasmine leaf in baggage from the Philippines.

Diatraea magnifactella (Crambidae) in surgarcane node in baggage from Mexico. Dichocrocis punctiferalis (Pyraustidae) on pine tree in baggage from Japan. Epinotia aporema (Olethreutidae) in string bean in baggage and stores from

Mexico.

Euscepes postfasciatus (Curculionidae) in sweetpotato in air baggage from Puerto Rico, baggage from Hawaii, and stores from Brazil, Peru, and Trinidad. Evergestis forficalis (Pyraustidae) in cabbage in stores from France, Germany,

Frankliniella formosae (Thripidae) (53 times) on carnation, chrysanthemum, cyclamen, fairybells, flowers, gardenia, lychee, rice, roses, and screwpine. Countries of origin were American Samoa, Formosa, Hong Kong, Japan, Okinawa, Philippines, and an unknown origin.

Frankliniella intonsa (Thripidae) (15 times) on carnation, flowers, gladiolus, nursery stock, roses, and in soil with primrose plant from England, France, Germany, Iceland, Israel, Netherlands, and unknown origin, and Yugoslavia.

Gnorimoschema ocellatella (Gelechiidae) in beet in stores from the United Arab Republic, with stores by air from Italy, and in Swiss chard in stores from Italy.

Grapholitha functorana (Olethreutidae) in plum in air baggage from Czechoslowskii and Polechiidae. vakia and Poland.

Grapholitha janthiana (Olethreutidae) in apple in air baggage from Hungary. Gymnandrosoma aurantianum (Olethreutidae) in sweet orange in air stores from

an unknown origin and stores from Colombia.

Harmolita ips (Eurytomidae) in straw packing in cargo from France.

Lampides boeticus (Lycaenidae) in agati sesbania in air baggage and in mauna loa lei in air baggage, baggage, and quarters from Hawaii; and in pea in stores from Japan.

Laspeyresia araucaria (Olethreutidae) in Araucaria sp. seed in airmail and in Norfolk-Island-pine seed in air baggage and aircargo from Brazil and in parana

araucaria seed in aircargo from Argentina.

Leucinodes orbonalis (Pyraustidae) in eggplant in stores from West Africa. Leucoptera scitella (Lyonetiidae) with apple in air stores from England and stores from Italy.

Lixus junci (Curculionidae) in beet in stores from the United Arab Republic. Lobesia botrana (Olethreutidae) in grape in air baggage from England, Italy,

and Lebanon.

Mamestra brassicae (Noctuidae) on cabbage in stores from France, Italy, and the Netherlands; on cauliflower in stores from France and Italy; on Chinese cabbage in stores from Japan; on lettuce in stores from Germany; and on Swiss

chard in stores from Italy.

Maruca testulalis (Pyraustidae) in hyacinth bean in air baggage from Trinidad; in mauna loa flowers in air baggage and baggage from Hawaii; in Phaseolus sp. in stores from Angola; in pigeonpea in air baggage from the Dominican Republic and Grenada and in aircargo, airmail, and cargo from Puerto Rico; in sesbania in air baggage and baggage from Hawaii; in string bean in air baggage and cargo from Puerto Rico and stores from Brazil, Japan, Puerto Rico, and Surinam; and in Strongylodon macrobotrys in air baggage from the Philippines.

Matsumuraeses phaseoli (Olethreutidae) in string bean in stores from Japan. Melolontha melolontha (Scarabaeidae) (5 times) as stowaway on airplane from

France and Switzerland.

Neoleucinodes elegantalis (Pyraustidae) in eggplant in air baggage from Brazil, naranjilla in air baggage from Colombia, and in tomato in cargo from Mexico. Oulema melanopa (Chrysomelidae) with cabbage in stores from Italy.

Parlatoria zizyphus (Coccidae) (55 times) on Citrus sp. leaf, grapefruit, lemon,

lime, Mandarin orange, pummelo, and sweet orange. Countries of origin were Algeria, British Guiana, China, Formosa, France, Guam, Hawaii, Hong Kong, Iran, Italy, Japan, Okinawa, Philippines, Republic of the Congo, Thailand,

Tunisia, and an unknown origin.

Pectinophora gossypiella (Gelechiidae), the pink bollworm (59 times), in bale Antigua, Bermuda, Cayman Islands, Cuba, Hawaii, and Turkey, baggage and quarters from Mexico, and mail from Hawaii; in cotton lint in quarters from Mexico, and cargo from Pakistan and Thailand; in okra pod in air baggage from Barbados, Dominican Republic, and Haiti, aircargo from Jamaica, and stores from the Dominican Republic; in seed cotton in aircargo from Pakistan and cargo and quarters from Mexico; in seed of Sea Island cotton in air baggage from Hawaii; and in seed of Upland cotton in quarters from Mexico.

Petrova cristata (Olethreutidae) in Japanese black pine cone in stores from Japan. Pieris brassicae (Pieridae) (14 times) in cabbage in stores from the Azores, Belgium, and Italy; in cauliflower in stores from Germany and Italy; and with military

cargo from Italy.

Prays oleellus (Hyponomeutidae) in olive in air baggage from Italy, Lebanon,

and Syria and aircargo from Italy.

Prodenia litura (Noctuidae) in airplane from the West Pacific, on flowers in air quarters from Formosa, on gladiolus in air baggage from Japan, and in pepper in stores from Israel.

Rhynchaenus populi (Curculionidae) on cut lilac in aircargo from the Nether-

Sesamia cretica (Noctuidae), the durra stem borer (8 times), in broomcorn in air baggage from France and Greece, baggage from Italy, and cargo from Greece

and Italy.

Stenoma catenifer (Stenomidae) (35 times) in avocado in air baggage from British Honduras, Colombia, Costa Rica, Ecuador, El Salvador, Nicaragua, Panama, and Venezuela, aircargo from Mexico and Panama, baggage from Honduras, Mexico, and Panama, quarters from Ecuador, and stores from Colombia, Ecuador, and Panama.

Taeniothrips gracilis (Thripidae) (18 times) on autumn lycoris, shorttube lycoris, and Lycoris sp. bulbs in cargo from Japan; on polyanthus narcissus in air baggage

Tetranychus viennensis (Tetranychidae) on apple in air baggage from Japan.

Tetranychus viennensis (Tetranychidae) on apple in air baggage from Poland.

Thrips major (Thripidae) on carnation in aircargo from Italy; on China aster in air baggage from the Netherlands; on mixed flowers in air baggage from England and air quarters from England, Turkey, and an unknown origin; on nursery stock in cargo from the Netherlands; and on roses in air baggage from Denmark,

England, and Poland.

Trogoderma granarium (Dermestidae), the khapra beetle (249 times), with bagging (including new and used burlap and wrappers on various cargo shipments and stores), in bean, in cargo hold of ship, in cinnamon quills, corn seed (in mail), cumin seed, debris, grain residue, guar gum, gum arabic, gum ghatti, karaya gum, mangrove bark, myrobalan, pea, peanut, pigeonpea, rice, soybean, turmeric, various dry stores, and wheat flour and straw. Countries of origin were Belgium, Ceylon, China, England, Formosa, France, Greece, Hong Kong, India, Indonesia, Iran, Italy, Korea, Kuwait, Mexico, Netherlands, Pakistan, Senegal, Sierra Leone, Singapore, Sudan, Tanganyika, Thailand, United Arab Republic, an unknown origin, and West Africa.

Udea ferrugalis (Pyraustidae) on cabbage in stores from Portugal, on cauliflower

in stores from England, on celery in stores from France, on geranium leaf in air baggage from Portugal, and on zucchini squash in stores from Italy.

Unaspis yanonensis (Coccidae), the yanone scale (356 times), on calamondin orange, Citrus sp., grapefruit, ichandarin, lemon, lime, King orange, Mandarin orange, pummelo, sour orange, sweet orange, and tangelo. Countries of origin were Australia, Hong Kong, Japan, Philippines, and an unknown origin.

Zeadiatraea lineolata (Crambidae) in corn in air baggage from Guatemala

and air stores from the Bahamas.

SNAILS

The following snail interceptions are of special interest: Achatina fulica (10 times) in air baggage from Hawaii and with military cargo from Okinawa.

Archachatina marginata in aircargo from Spain.

Arianta arbustorum in soil with rose plant in mail from Germany and on straw-

berry plant in aircargo from the Netherlands.

Bradybaena similaris (7 times) on Anthurium sp. flower, fern asparagus, and ginger root in mail from Hawaii; and with snapdragon flower and unidentified plant in air baggage from Bermuda.

Cochlicella barbara (26 times) on common four-o'clock seed in cargo from France; on military cargo from Italy, Libya, Morocco, and Spain; and in soil in baggage from Italy.

Cochlicella conoidea on military cargo from Spain.

Cochlicella ventrosa (16 times) on broccoli seed in baggage from Italy; on cedar block in stores from Bermuda; on military cargo from the Azores, Italy, Morocco, Spain, and Turkey; and in soil with unidentified plant in air baggage from Bermuda.

Fourteen species of Helicella were intercepted a total of 75 times on automobile, baggage, general cargo, military cargo, soil, and various plant material from the Azores, Cuba, England, France, Greece, Italy, Spain, Turkey, and an unknown origin.

Monacha cantiana with unidentified plants in cargo from Germany.

Monacha carthusiana on sainfoin seed in baggage from Italy.

Monacha olivieri with military cargo from Turkey.

Rumina decollata on palm seed in baggage from Mexico and in soil with unidentified plant in air baggage from Bermuda and baggage from Mexico.

Sculptaria retisculpta on Myrothamnus flabellifolia plant in aircargo from the

Republic of the Congo.

Subulina octona (15 times) on military cargo from Libya; on orchid plant in air baggage from British Honduras, aircargo from British Honduras, Colombia, and Jamaica, baggage from Jamaica, and cargo from Mexico; in soil with coleus plant in air baggage from Honduras; in soil with croton plant in air baggage from Jamaica; in soil with Dieffenbachia sp. plant in baggage from Puerto Rico; and in soil with unidentified plant in baggage from Mexico.

Theba pisana, the Mediterranean land snail (82 times), on automobile, in air baggage, on general cargo and military cargo; on cipollino, flowers, herb, mollusk, rose, rosemary, and various plant material in air baggage, aircargo, and cargo; and on cabbage, cauliflower, lettuce, miscellaneous stores, parsley, and potato in stores. Countries of origin were the Azores, Cuba, France, Israel, Italy, Libya,

Morocco, Spain, and an unknown origin.

Theba planata on military cargo from Spain.

Veronicella moreleti on banana in cargo from Honduras and on Chamaedorea

sp. palm leaf in aircargo from Mexico.

Other snails of potential economic importance were: Bulimulus fraterculus, B. hepatostomus, B. unicolor, Capillifera plebeia, Cecilioides acicula, C. aperta, Cepaea nemoralis, Helicina neritella, H. substriata, H. zephyrina, Helix aspersa, H. cincta, H. leucorum, H. pomatia, Lamellaxis gracilis, Limax marginatus, Neocyclotus dysoni cookei, Otala lactea, O. vermiculata, and Oxychilus alliarius.

DISEASES

Elsinoe australis, the sweet orange scab, was intercepted 213 times; 129 from Brazil, 64 from Argentina, 13 from an unknown origin, 4 from Paraguay, and 3 from Uruguay. The hosts were Citrus reticulata hybrid, grapefruit, lemon, lime,

Mandarin orange, sweet orange, and tangor.

Guignardia (Phoma) citricarpa, the black spot of citrus, was intercepted 464 times; 95 from Japan, 91 from Hong Kong, 83 from the Republic of South Africa, 63 from Australia, 44 from an unknown origin, 36 from China, 18 from Formosa, 7 from Asia (country(?)), 5 each from Brazil and the Philippines, 4 from Tahiti(?), 3 from Okinawa, 2 each from Argentina and Korea, and 1 each from the Federation of Malaya, Macao, Mozambique, Singapore, Thailand, and Vietnam. The hosts were Citrus sp., Fortunella sp.(?), grapefruit, lemon, lime, Mandarin orange, pummelo, sour orange, sweet orange, and tangelo.

Xanthomonas citri, citrus canker, was intercepted 271 times; 217 from Japan, 20 from Hong Kong, 10 from India, 9 from an unknown origin, 5 from China, 4 from Thailand, 2 from Formosa, and 1 each from Afghanistan, the Federation of Malaya, Guam, and Indonesia. The hosts were Citrus aurantium X C. reticulata, Citrus sp., grapefruit, ichandarin, lemon, lime, Mandarin orange, pummelo, sour orange, sweet orange, tangelo, tangor, and "yuzu."

Xanthomonas sp. (Cancrosis B) was intercepted 17 times; 10 from Argentina, 5 from an unknown origin, and 1 each from Brazil an Uruguay. The hosts were lemon, Mandarin orange, and sweet orange.

Other pathogens of special interest are:

Ascochyta armoraciae on horseradish tops in stores from Germany. Not reported from the United States as far as is known.

Coniothyrium trabutii on geranium leaf in baggage from Mexico. No reports

from there as far as known.

Diaporthe camelliae on camellia twig in airmail from New Zealand.

Didymascella thujina on leaf of arborvitae plant in baggage from Canada.

Elsinoe piri (Sphaceloma stage) on apple in stores from Spain.

Gymnosporangium cornutum on European mountain ash leaf in air baggage from Finland and baggage from Norway.

Gymnosporangium haraeanum on pyramid Chinese juniper in air baggage and

cargo from Japan.

Macrophoma dalmatica on olives in air baggage from Lebanon.

Phomopsis cedrelae on cigarbox cedrela seed and pod in aircargo from Dominica. Phyllosticta bromeliae on bromeliad in baggage from Mexico.

Puccinia abyssinica on Jasminum abyssinicum leaf in mail from Ethiopia.

Puccinia iridis on iris leaf in air baggage from Bermuda and aircargo from Haiti. Pythium intermedium, P. mamillatum, P. salpingophorum, and P. ultimum on roots of trees in aircargo from the Union of Soviet Socialist Republics.

Rhytisma ilicis-latifoliae (Melasmia stage) on Ilex integra leaf in airmail from

Septoria minimum on anthurium leaf in airmail from France and mail from the Netherlands.

Sphaceloma fawcettii var. scabiosa (10 times) on lemon in air stores, quarters, and stores from Australia.

Sphaceloma punicae on pomegranate in air baggage from the Dominican Repub-New locality for this fungus.

Sphaceloma rosarum on rose leaf in air baggage from England and Germany.

Sphaceloma spondiadis(?) on vi-apple in baggage from Puerto Rico.

Sphaerophragmium acaciae on Lebbek albizzia leaf in baggage from the Bahamas. Thecaphora solani on Solanum stoloniferum tuber in baggage from Mexico.

Uredo nidularii on bromeliad leaf in air baggage from Colombia and aircargo from Costa Rica; and on tillandsia leaf in aircargo from Mexico and Panama.

Uromyces fabae on lentil in airmail and mail from Chile.

CORRECTION: The 1960 list showed Pucciniastrum arcticum Tranz. on Rubus chamaemorus from Norway. This has now been identified as Melampsoridium betulinum (Fr.) Kleb. on Betula odorata.

NEMATODES

Aphelenchoides fragariae in bletilla orchid in cargo from Japan.

Aphelenchoides subtenuis in narcissus in cargo from Italy.

Criconema celetum in soil with anthurium plants in baggage from Mexico. Criconemoides curvatum in soil with begonia in baggage from Argentina and in

soil with unidentified plant in baggage from Mexico.

Criconemoides mutabile in soil with carpetgrass, philodendron, pine seedling, and treebine in baggage from Mexico.

Criconemoides peruense in soil with begonia in baggage from Mexico.

Ditylenchus destructor in autumn-crocus and Blushing Bride dwarf gladiolus in cargo from the Netherlands.

Ditylenchus dipsaci in garlic in cargo from Mexico; and in narcissus bulb in

mail and onion sets in baggage from England.

Helicotylenchus buxophilus in soil with euonymus plant in baggage from Mexico. Helicotylenchus dihystera in Indiarubber fig plant in baggage from Brazil; in soil with begonia plant in air baggage from the Azores and baggage from Argentina; in soil with azalea, balsam, caladium, citrus, common rue, and euphorbia plants, lily bulb, peach tree, portulaca, sansevieria, spiderwort, and succulent plants in baggage from Mexico; and in soil with unidentified plant in air baggage from Eng-

Helicotylenchus nannus in Aglaonema sp. root in aircargo, in soil with begonia, fern, hydrangea, and mint plants in baggage, and in soil with chestnut dioon plants in cargo from Mexico; and in soil with common swordfern and Sprenger

asparagus in baggage from Italy.

Heterodera avenae, the oat nematode (13 times), in soil sample in air baggage from Germany and in soil with the following: Automobiles in cargo from England and Germany, cactus plant in air baggage from Germany, dasheen in cargo from the Azores, garlic in cargo from Italy, larch tree and polypody fern in baggage from Austria, military cargo by air from England and France, peach tree in baggage from Italy, and potato in stores from the Canary Islands.

Heterodera cacti (75 times) in soil sample and in soil with amaryllis bulb, begonia, bougainvillea, cactus, covers on cotton bales, dahlia roots, euphorbia, gariic, geranium, Indiarubber fig plant, lily bulb, potato, portulaca, pricklypear, railway car, spiderwort, and tractor from the following countries: Austria, Belgium, Costa

Rica, England, France, Germany, Italy, Mexico, Peru, and Sweden.

Heterodera humuli in soil with hops in aircargo from Germany. Heterodera punctata (47 times) in soil sample, soil with army tanks, automobiles, celery, dasheen, lily bulb, military cargo, mudbird nest, potato, semi-trailer, and the following plants: Banana, begonia, cactus, geranium, Indiarubber fig, lavender, lily, philodendron, primrose, sequoia, shamrock, stonecrop, unidentified, and violet. Countries of origin were Argentina, Belgium, England, Germany, Ireland, violet. Countries of origin were Argentina, Belgium, Engiano, Germany, Heiano, Italy, Mexico, Morocco, Netherlands, Norway, Portugal, Sweden, an unknown origin, and Wales.

Heterodera rostochiensis, the golden nematode (83 times), in soil sample and in soil with the following: African-violet, aroid plant, automobiles, beet, cactus, celery, coleus, conifer plant, dahlia roots, geranium cutting and plant, gladiolus corm, heather plant, horseradish, ivy plant, lavender plant, lilac plant, lily-of-thevalley pips, onion sets, Jerusalem cherry plant, oxalis, potato, primrose, Ribes sp., shamrock, soapberry plant, Solanum andigena, spearmint, Sprenger asparagus, stonecrop, strawberry plant, tree fern log, tuberose, turnip, unidentified bulb and plant, and violet plant. Countries of origin were Denmark, England, France, Germany, Ireland, Mexico, Netherlands, Peru, Poland, Scotland, Sweden, and an unknown origin.

Hoplolaimus uniformis in soil with celeriac in stores from the Netherlands.

The rootknot nematodes, Meloidogyne arenaria, M. arenaria arenaria, M. arenaria thamesi, M. hapla, M. incognita, M. incognita acrita, M. incognita incognita (first interception), M. javanica, and M. javanica javanica (first interception) were intercepted a total of 156 times from Argentina, Azores, Brazil, Canal Zone, Chile, Costa Rica, Cuba, Dominican Republic, Ecuador, England, France, Germany, Guatemala, India, Italy, Jamaica, Japan, Mexico, Morocco, Netherlands, Panama, Peru, Portugal, Republic of South Africa, Sierra Leone, Spain, Switzerland, Tahiti, Trinidad, and West Africa. The hosts were roots of various flowers, ornamental plants, and vegetables.

Pratylenchus coffeae in dahlia roots in mail from Australia, in soil with common

rue in baggage from Mexico, and in yam in air baggage from Jamaica.

Pratylenchus penetrans in clematis and toadlily roots in aircargo and in goldenray

roots in cargo from the Netherlands.

Pratylenchus scribneri in apple root stock in cargo from Canada.

Radopholus similis in flamingo anthurium and in ginger plant in mail from

Rotylenchus robustus in soil with celeriac in stores from the Netherlands and in soil with unidentified plants in air baggage from the Azores and Germany.

Scutellonema brachyurum in amaryllis bulb and crassula plant in baggage from Mexico; Indiarubber fig plant in baggage from Brazil; in soil with kalanchoe in air baggage from Guatemala; and in soil with common rue, philodendron, and unidentified bulbs and plants in baggage from Mexico.

Scutellonema bradys in yam root in air baggage from Cuba.

Tylenchorhynchus acti in soil with cactus plant in baggage from Mexico.
Tylenchorhynchus capitatus in soil with begonia, lemongrass, and spiderwort plants in baggage from Mexico.

Tylenchorhynchus claytoni in soil with common swordfern and Sprenger asparagus in baggage from Italy.

INCOMPLETELY DETERMINED PESTS

It is not always possible to complete a determination as to species, due to the stage or condition of the insect or pathogen when intercepted or the fact that it may be undescribed. Many of these pests are of potential economic importance, unreported from the country of origin or the United States, or new to the host plant. Some of the significant ones are included in this writeup, but not in the tabulation except in the summary. This year there were 3,223 insects, 357 diseases, and 936 nematodes, or a total of 4,516 incompletely determined interceptions considered important enough to record.

INCOMPLETELY DETERMINED FRUIT FLIES

There were 186 incompletely determined fruit fly interceptions as follows: Anastrepha sp., possibly ludens (7 times) in apple, lime, mango, sapote, and sweet

orange in baggage, and in grapefruit in stores from Mexico.

orange in baggage, and in grapefruit in stores from Mexico.

Anastrepha sp., possibly mombinpraeoptans (27 times), in grapefruit in stores from Costa Rica; in guava in air baggage from Guatemala, baggage from Mexico, and cargo from Tortola; in mango in air baggage from the Bahamas, Colombia, Dominican Republic, El Salvador, Guatemala, Honduras, Jamaica, and Nicaragua, in airmail from Jamaica, baggage from Mexico and Panama, and in cargo and stores from the Dominican Republic; in purple mombin in air baggage from Guatemala and Panama; and in Spondias sp. in air baggage from Nicaragua.

Anastrepha sp., possibly serpentina (twice), in cainito star-apple in air baggage from El Salvador and in mamey sapote in baggage from Mexico.

Anastrepha sp., possibly strata (13 times), in guava in air baggage from Costa

Anastrepha sp., possibly striata (13 times), in guava in air baggage from Costa Rica and El Salvador and in baggage and mail from Mexico.

Anastrepha sp., possibly suspensa (13 times), in guava in air baggage from the Dominican Republic and Puerto Rico and in airmail and baggage from Puerto

Anastrepha sp. (89 times) in Annona sp., apple, Arabian coffee berry, cherimoya, Anastrepna sp. (89 times) in Annona sp., apple, Arabian coffee berry, cherimoya, giant granadilla, grapefruit, guava, ilama, loquat, Mandarin orange, mango, peach, pear, pummelo, purple mombin, rose-apple, sapodilla, sapote, sour lime, Spondias sp., star-apple, sweet orange, tropical almond, and yellow mombin. Countries of origin were: Argentina, Brazil, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, Panama, Peru, Puerto Rico, Tortola, Trinidad, an unknown origin, and Venezuela.

Dacus sp., prob. dorsalis (once), in mango in air baggage from Hawaii.

Dacus sp. (twice) in pepper in mail from Thailand and in sapodilla in air stores from Guam. Dacus sp. (?) (3 times) in avocado in air baggage from Tahiti, grapefruit in stores from the Republic of South Africa, and sapodilla in air stores from the Philippines.

Euleia sp., probably heraclei (L.) (once), in parsley in stores from Spain.

Paroxyna s. 1. sp., possibly Dioxyna sororcula (Wied.) (twice), on Osteospermum muricatum and O. thodei seed in mail from the Republic of South Africa.

Rhagoletis sp., probably alternata (Fall.) (once), in rose hips in air baggage from Italy.

Rhagoletis sp. (4 times) in apple and hawthorn fruit in baggage from Mexico. Rhagoletis sp.(?)(3 times) in peach and redhaw fruit in baggage from Mexico and

in Tartarian honeysuckle seed in cargo from Italy.

Tephritidae (15 times) in carnation in air quarters from an unknown origin, in chayote in stores from the Dominican Republic, in chupa-chupa fruit in air baggage from Ecuador, dwarf banana in air baggage from Hawaii, with flower pot in baggage from Mexico, in galangal flower in air quarters from an unknown origin, in giantreed node in baggage from Italy, in grapefruit in stores from the Republic of South Africa, in lychee nut and mango in air baggage from Vietnam (?), in peach in air baggage from Venezuela, in pear in air baggage from England, in sphagnum moss with ginseng root in air baggage from Korea, and in Turkterebinth pistache in air baggage from Greece. Tephritidae (?) (once) in pomegranate in air baggage from Argentina.

Trupanea sp. (once) adults with marigolds in air quarters from Mexico.

panea sp.(?) (once) in flowering head of encelia in baggage from Mexico.

INSECTS OTHER THAN FRUIT FLIES

The following incompletely determined insects, other than fruit flies, are of

special interest:

Aleyrodidae, Aleurodicinae, new genus near Aleurodicus, n. sp., on Epidendrum spp. leaf in aircargo from Honduras and cargo from Mexico; on Laelia anceps leaf in cargo from Mexico; on Odontoglossum grande leaf in air baggage from Guatemala; on Oncidium spp. leaf in aircargo and cargo from Mexico; and on orchid leaf in air baggage from Guatemala and Honduras, aircargo from the Canal Zone, Guatemala, Honduras, and Mexico, airmail from the Canal Zone, and baggage and cargo from Mexico.

Alsophila sp. (Geometridae) on Prunus sp. branch in air baggage from Japan. Anaulacomera sp. (Tettigoniidae), a distinctive species useful to the U.S.

National Museum Collection, on orchid in aircargo from Peru.

Aphidae, Panaphini, genus and species undescribed, on pine twig in air baggage No description found of a species on pine resembling this. from Italy.

Blastodacna sp., near or atra (Cosmopterygidae), on apple in air stores from an

unknown origin, probably Spain.

Brachyrhinus sp. (Curculionidae) on Siebold stonecrop roots in baggage from Switzerland, in soil with herbs in baggage from Italy, and in soil with larch in baggage from Austria.

Ceutorhynchus sp., probably pleurostigma (Curculionidae), in rutabaga root in cargo from Germany and in turnip root in stores from Belgium, England, and

Cnephasia sp. (Tortricidae) on gentian bloom in mail from Switzerland, on lettuce in stores from France, on parsley in stores from Japan, and on strawberry plant in aircargo from France.

Ctenicera sp (Elateridae) in soil with unidentified plant in air baggage from

Poland.

Diaprepes sp., probably abbreviatus (L.) (Curculionidae), in yam in cargo from Puerto Rico.

Epicaerus sp., possibly cognatus Sharp (Curculionidae), in potato in baggage and stores from Mexico.

"Eulia" sp. (Tortricidae) in pear in aircargo from Ecuador.

Euzophora sp., near or bigella Zell. (Phycitidae), in quince in baggage from Greece.

Gnorimoschema sp., near or borsaniella (Gelechiidae), in pepper in air baggage from Peru and stores from Argentina.

Grapholitha sp., probably funebrana (Olethreutidae), in plum in air baggage from

Czechoslovakia and Italy and air stores from France.

Gymnandrosoma sp., near or aurantianum (Olethreutidae), in guava in air baggage from Colombia and in cacao pod in baggage from Bermuda and Trinidad. Harmolita sp. (Eurytomidae) on esparto needlegrass and unidentified straw in

cargo from Italy. Heilipus sp., probably lauri Boh. (Curculionidae), in avocado seed in air baggage

from Costa Rica.

Heliothis sp., probably armigera (Noctuidae), on carnation flower in aircargo from France and Spain, on gladiolus flower in air quarters from France, and on strawflower in air baggage and airmail from the Philippines.

Homothrips sp., probably distinctus (Thripidae), on protea flower in aircargo from the Republic of South Africa.

Hoplandrothrips, undescribed species (Phlaeothripidae), on Davallia mariesii fern rhizome in cargo from Japan.

Hyperodes sp. (Curculionidae) in carrot in stores from Argentina. Hyperodes

sp., or near, on burhead plant in aircargo from Peru.

Ips sp., apparently a species not established in the United States (Scolytidae), in pine bark of crate and in unidentified wood of crate in cargo from Italy.

Leucoptera sp., probably lustratella H.-S. (Lyonetiidae), with apple in stores from Italy.

Lixus sp., possibly junci (Curculionidae), in beet root in stores from the United Arab Republic.

Lygaeidae, genus and species not in the U.S. National Museum, in airplane from an unknown origin; in cape-marigold seed in airmail from the Republic of South Africa; on Dianthus sp. flower in air baggage from Mexico; on garden asparagus in aircargo from New Zealand; on mixed cut flowers in air baggage from the Republic of South Africa; in okra seed in mail from Nigeria; on orchid in aircargo from Brazil, Honduras, and India and airmail from the Canal Zone; and in soil with European grape plant in mail from Italy.

Melanotus sp. (Elateridae) on orchid plant in airmail from Antigua; and on

rosemary plant and in soil with amaryllis bulb in air baggage from Italy.

Odontaleyrodes sp., apparently undescribed (Aleyrodidae), on Argostemma sp. leaf in aircargo from Indonesia.

Olethreutidae, probably Cryptophlebia sp., in grapefruit in stores from the Republic of South Africa, in mango seed in air stores from Thailand, and in sweet orange in air baggage from Guinea.

Pantomorus sp. (Curculionidae) on lemongrass in baggage from Mexico and in

soil with Indiarubber fig plant in baggage from Brazil.

Phycitidae, presumably *Myelois* group but does not match any material in the U.S. National Museum, in Ivorycoast cherry-orange in airmail from the Republic of the Congo.

Phyllocoptes n. sp. (Eriophyidae), an interesting form, on soursop fruit in air baggage from Costa Rica. Phyllocoptes sp., apparently n. sp., not assignable to any known apple eriophyid, on apple in air stores from Honduras.

Phyllotreta sp., possibly undulata Kutsch. (Chrysomelidae), on cabbage in stores

from England.

Phytomyza sp., probably rufipes (Agromyzidae), on cauliflower in stores from France and the Netherlands and on radish in air stores from an unknown origin. Prays sp., near or endocarpa Meyr. (Hyponomeutidae), in grapefruit in air baggage and Mandarin orange in air stores from the Philippines.

Premnotrypes sp. (Curculionidae) (34 times) in potato in air baggage from Colombia, Ecuador, and Peru, in air stores from Chile, in baggage from Peru,

and in stores from Colombia, Ecuador, and Peru.

Pseudaonidia sp., not placed as anything described (Coccidae), on orchid plant in aircargo from India.

Rhynchites sp. (Curculionidae) in cherry in air baggage from Italy and on Prunus

sp. plant in airmail from Iran.

Sternochetus sp., probably mangiferae (Curculionidae), in mango in air baggage

from the Philippines and quarters from Hawaii.

Tenuipalpus n. sp. (Tenuipalpidae) on Plumeria sp.(?) in mail from Mexico. Xyleborus sp., near testaceus Walk. (Scolytidae), in raintree saman log in cargo from Fiji.

INCOMPLETELY DETERMINED DISEASES

Of the 357 incompletely determined diseases which were recorded, the following are of special interest:

Cercospora sp. on sweet basil leaf and pricklypear stem in baggage from Mexico.

Cryptosphaeria sp. on Dendrobium sp. stem in aircargo from India.
Cytospora sp., probably sydowiana (Syd.) Camara, on camellia twig in airmail from New Zealand. Cytospora sp. on astilbe flower stalk in cargo from the Netherlands. None re-

ported on this host as far as known. Dothiorella sp. on Araucaria cookii seed in aircargo and Howea forsteriana seed

in cargo from Australia. Microstroma sp. on tomato in stores from Spain. Microstroma sp. (?) on loquat

in air quarters from Italy. Monochaetia sp. on sapodilla in baggage from Mexico. Not reported on this

host as far as is known. Mycosphaerella sp. on Jatropha sp. in baggage from Mexico and on tree peony

stem in cargo and mail from Japan.

Pellicularia sp. on orchid plant in aircargo from Peru. Pestalotia sp. on Agave sp. leaf in baggage from Mexico. There is no report

Phyllostictina sp. on tropic-American hymenocallis in mail from Hawaii.

Ravenelia sp., close to pithecolobii Arth., on guamachil apes-earring seed in baggage from Mexico.

Septoria sp., probably an undescribed species, on Agave sp. in baggage from

Mexico. Sphenospora sp., probably kevorkianii, on Epidendrum sp. leaf in aircargo from Honduras, on *Ionopsis* sp. leaf in air baggage from the Dominican Republic and in cargo from Mexico, on *Oncidium pusillum* leaf in aircargo from Peru, on *Onci*dium sp. leaf in aircargo from British Honduras and Peru, and on orchid leaf in aircargo from Honduras.

Sphenospora sp., probably saphena, on orchid leaf in aircargo from Guatemala. Sphenospora sp. on Ornithocephalus sp. leaf in air baggage from Peru. Probably a new host.

Stomiopeltis sp., probably should be described as new, on vi-apple in air baggage from Panama and Trinidad. None reported on Anacardiaceae.

Trematosphaeria sp. on leaf of Agave sp. plant in baggage from Mexico. No report on this host as far as known.

Virus, either a new virus or a new strain of an old virus, on carnation leaf in cargo from Canada.

INCOMPLETELY DETERMINED NEMATODES

There were 936 nematode interceptions not completely determined as follows:

Acrobeloides sp. in apple root stock in cargo from Canada.

Aphelenchoides sp. in amaryllis bulb in baggage from Mexico; in carnation in air baggage from Germany; in dahlia root in cargo from Japan and mail from Australia; in orchid, portulaca, rose, and unidentified plants and in soil with cactus in baggage from Mexico; in soil sample in cargo from Mexico; and in soil with tuberose in cargo from Italy.

Aphelenchus sp. in apple root stock in cargo from Canada; in soil with army tank in cargo from Germany; in soil with automobile in cargo from the Republic of South Africa; in soil with unidentified bulb in baggage from Cuba; in soil with cactus, citrus, dahlia, Eugenia sp.(?), fig, lemongrass, and rose plants in baggage

from Mexico; and in soil with grape cuttings in air baggage from Italy.

Criconema sp., undescribed, in soil with African-violet and unidentified plant in baggage from Mexico. *Criconema* sp. in soil with unidentified plant in baggage

from Mexico.

Criconemoides sp., probably xenoplax Raski, in soil with lily bulb in baggage

from Mexico.

Criconemoides sp. in chrysanthemum in airmail from Formosa; in rhubarb root in baggage from Canada; and in soil sample in baggage and cargo and in soil with avocado, Bermuda grass, cactus, citrus, croton, echeveria, fig, guava, lemongrass, onion, palm, spiderwort, and unidentified plants in baggage from Mexico.

Ditylenchus sp. in dahlia root in cargo from Japan and mail from Australia, in garlic in cargo from Italy, in soil with cactus and unidentified plant in baggage from Mexico, and in torchlily in aircargo from England.

Helicotylenchus sp., probably dihystera, in soil with begonia in cargo from Mexico. Helicotylenchus sp. was intercepted 98 times; 82 from Mexico, 2 each from the Azores and Brazil, and 1 each from Alaska, Cuba, England, France, Germany, Hawaii, Ireland, Italy, Japan, Portugal, Republic of South Africa, and Turkey. The hosts were various flower plants and soil with army tanks, refrigerator car, and unidentified bulbs and plants.

Hemicycliophora sp. in soil with mango plant in baggage from Mexico.

Heterodera sp., probably avenae, in soil with beet in stores from the Netherlands

and in soil with peach tree in air baggage from Germany.

Heterodera sp., probably humuli, in soil with hop roots in cargo from Canada. Heterodera sp., probably punctata, in soil with automobile in cargo from an unknown origin, in soil with cuphea plant in baggage from Mexico, and in soil with holly and lavender plants in air baggage from England.

Heterodera sp., probably rostochiensis, in soil in air baggage from Germany, in soil with automobile in cargo from England, in soil with heather in air baggage from Scotland, and in soil and debris from vegetables in stores from the Nether-

lands.

Heterodera sp., probably trifolii, in soil with army tank in cargo from Germany. Heterodera sp., cacti group (39 times), from Belgium, Canal Zone, England, France, Germany, Italy, Japan, Mexico, Poland, Portugal, Republic of South Africa, and Turkey. These were taken from a soil sample, soil with automobiles,

and soil with cactus and various plants.

Heterodera sp., goettingiana group (207 times), cyst with cucurbit seed; in soil sample; in soil with automobile, military cargo, and tractor; in soil with carrot, celery, garlic, leek, onion, potato, rutabaga, and turnip in stores; and in soil with various bulbs and plants. Countries of origin were Argentina, Azores, Belguim, Brazil, Czechoslovakia, Denmark, England, France, Germany, Greece, Guatemala, Ireland, Israel, Italy, Japan, Lebanon, Mexico, Netherlands, Peru, Poland, Spain, Switzerland, United Arab Republic, an unknown origin, and Yugoslavia.

Heterodera sp., rostochiensis group, in soil with celery in stores from England, soil with orchid in baggage from Guatemala, soil with shamrock in airmail from Ireland, and soil with jasmine, succulent, and unidentified plants in baggage from

Mexico.

Heterodera sp., schachtii group (265 times), cysts with lentil seed; in soil ballast and samples; in soil with automobiles, bicycle, military cargo, railway car, shoes, and tractor; in soil with beet, carrot, celeriac, celery, garlic, horseradish, leek, onion, parsnip, potato, rutabaga, salsify, turnip, and yam in stores; and in soil with various bulbs and plants. Countries of origin were Argentina(?), Azores, Belgium, Brazil, British Honduras, Canada, Chile, Colombia, Czechoslovakia, Denmark, East Germany, England, France, Germany (West), Greece, India, Ireland, Israel, Italy, Japan, Netherlands, Norway, Pakistan, Panama, Peru, Poland, Portugal, Republic of South Africa, Spain, Sweden, Turkey, United Arab Republic, Wales, and Yugoslavia.

Heterodera sp. (24 times) in soil sample; in soil with automobile, military cargo, now play, and truck in soil with horseredish enjoy potato and truck in soil with horseredish enjoy potato and truck in soil with horseredish enjoy potato.

snow plow, and truck; in soil with horseradish, onion, potato, and turnip in stores; and in soil with asparagus, begonia, Calathea sp., citrus, dahlia, fuchsia, heather, stonecrop, and unidentified plants. Countries of origin were England, France, Germany, Hawaii, Hong Kong, Italy, Mexico, Peru, Portuguese Guinea, Scot-

land, Spain, and Turkey.

Hoplolaimus sp., probably seinhorsti Luc, in soil with croton plant in baggage

from Mexico.

Hoplolaimus sp., undescribed, in soil with cactus plant in baggage from Mexico. Hoplolaimus sp. in soil sample and soil with onion, succulent plant, and sweetpotato in baggage from Mexico.

Meloidogyne sp., near arenaria, in carrot root in stores from Japan and in rubber-

vine root in air baggage from Colombia.

Meloidogyne sp., probably arenaria thamesi, in dahlia root in cargo from Japan. Meloidogyne sp., probably hapla, in beet root in stores from Poland and in brassbuttons root in aircargo from Germany.

Meloidogyne sp., possibly incognita, in beet in stores from Brazil, dasheen in cargo from Cuba, Ledenbergia rosea-aenea root in aircargo from Ireland, sansevieria in air baggage from Venezuela, and Stephanotis sp. root in baggage from Mexico. Meloidogyne sp., possibly incognita acrita, in tulip root in baggage from England.

Meloidogyne sp., probably javanica, in beet root in stores from Australia, freesia root in air baggage from the Azores, strawberry root in aircargo from France, and

yam in air baggage from Puerto Rico.

Meloidogyne n. sp. (?), close to incognita acrita, in astilbe root in cargo from the Meloidogyne sp., possibly a new species, in agapanthus root in Netherlands.

mail from India.

Meloidogyne sp. (76 times) in roots of various bulbs, corms, flower plants, tubers, and vegetables from the Canal Zone, Cuba, Dominican Republic, England, Fiji, Formosa, France, Germany, Guatemala, Hawaii, India, Italy, Japan, Mexico, Netherlands, Peru, Singapore, and Switzerland.

Paratylenchus sp. in soil with African-violet in baggage from Mexico.

Pratylenchus sp., probably penetrans, in babysbreath root in cargo from the Netherlands.

Pratylenchus sp. (22 times) in roots of various flower plants from Canada, Colombia, Japan, Mexico, and Netherlands.

Pseudhalenchus sp. in soil with portulaca in baggage from Mexico.

Psilenchus sp. in hibiscus, Josephs-coat amaranth, and soil with anthurium, gardenia, and lemongrass plants in baggage from Mexico; and in soil with mint plant in baggage from Cuba.

Radopholus sp. in flamingo anthurium and ginger plants in mail from Hawaii Rotylenchus sp. in crassula, gardenia, soil sample, and soil with fern plant in baggage from Mexico; in soil with automobile in cargo from Sweden; and in un-

identified plants in air baggage from England and an unknown origin.

Scutellonema sp. (22 times) in soil with automobiles in aircargo from Puerto Rico and cargo from Cuba; in soil with agave, amaryllis, asparagus-fern, begonia, caladium, citrus, *Eugenia* sp. (?), gardenia, lily, narcissus, philodendron, sansevieria, and unidentified plants in baggage from Mexico; and in yam root in air baggage from Cuba.

Tetylenchus sp. in amaryllis bulb in baggage from Mexico, in soil with railway refrigerator car in cargo from Mexico, and in soil sample and soil with echeveria and succulent plants in baggage from Mexico.

Trichodorus sp., undescribed, in soil with kalanchoe in air baggage from Guate-Trichodorus sp. in soil with fern plant in air baggage from Mexico. mala.

Tylenchorhynchus sp. (29 times) in cactus, carnation, crassula, and gardenia plants and in soil with bamboo, begonia, coleus, dahlia, fig, flatsedge, geranium, hydrangea, lemongrass, onion, peperomia, peppertree, rose, succulent, and unidentified plants in baggage from Mexico and in soil with stonecrop in air baggage from England.

Tylenchus sp. in chrysanthemum in air baggage from England, Indiarubber fig plant in baggage from Brazil, in rose plant in baggage from Mexico, in soil with army tank in cargo from Germany, in soil with begonia in baggage from Argentina, in soil with cyclamen in baggage from Canada, and in soil sample and soil with fig,

persimmon, rose, and unidentified plants in baggage from Mexico.

Xiphinema sp. in soil sample in air baggage from British Honduras and baggage and cargo from Mexico; in soil with acacia, banana, begonia, citrus, gardenia, lily, mango, succulent, and tuftroot plants and medicinal herbs in baggage from Mexico; in soil with croton plant in aircargo from British Honduras; and in soil with jasmine plant in air baggage from Cuba.

Hosts and Insects

Megastiamus suspectus (Hymenoptera) ACACIA:
Trogoderma granarium (Coleoptera)
ACALYPHA:
(Coleoptera) Adoretus sinicus (Coleoptera) ACHRAS: Anastrepha serpentina (Diptera)
AGAVE: Batrachedra linaria (Lepidoptera) Caulotops distanti (Hemiptera) Chrysomphalus tingi (Homoptera)
Ligyrocoris aurivilliana (Hemiptera)
Ozophora consanguineus (Hemiptera)
ALLIUM CEPA: Acrolepia assectella (Lepidoptera)
Myzus ascalonicus (Homoptera)
ALLIUM PORRUM: ALDIOM PORROM:
Acrolepia assectella (Lepidoptera)
Hispa atra (Lepidoptera)
Limax marginatus (Mollusca)
ALLIUM SATIVUM:
Brachycerus abidentatus (Coleoptera) Dyspessa ulula (Lepidoptera) Sinoxylon sexdentatum (Coleoptera) Taeniothrips hawaiiensis (Thysanoptera) Myzus ascalonicus (Homoptera) ALOE: Exptochiomera formosa (Hemiptera)
ALPINIA: Coccus viridis (Homoptera)
Geotomus pygmaeus (Hemiptera)
Monomorium destructor (Hymenoptera)
Pentalonia nigronervosa (Homoptera)
Pheidole megacephala (Hymenoptera)
Pulvinaria psidii (Homoptera) ALSTONIA Coccus viridis (Homoptera) ALYXIA: Ceroplastes rubens (Homoptera) Pinnaspis uniloba (Homoptera) ANACARDIUM: Schneidereria pistaciella (Lepidoptera) ANANAS:
Alpheias conspirata (Lepidoptera) Arpheus conspirutu (Leptuoptera)
Cryptocephalus marginicollis (Coleoptera)
Neoclytus acuminatus (Coleoptera)
Reticulitermes flavipes (Isoptera)
"Targionia" bromiliae (Homoptera)
ANEMONE: Myzus ascalonicus (Homoptera) ANNONA: Bephreta maculicollis (Hymenoptera) Cerconota anonella (Lepidoptera)
Ectomyelois ceratoniae (Lepidoptera)
Talponia batesi (Lepidoptera) ANOGEISSUS: Trogoderma granarium (Coleoptera)
ANTHURIUM: Bradybaena similaris (Mollusca)
Pheidole megacephala (Hymenoptera)
Pulvinaria psidii (Homoptera)
Selenothrips rubrecinctus (Thysanoptera)
Sinhanta gestia (Hampatera) Siphanta acuta (Homoptera) Xiphidiopsis lita (Homoptera) ANTIRRHINUM: Bradybaena similaris (Mollusca)
Taeniothrips gracilis (Thysanoptera)
Thrips flavus (Thysanoptera)
APIUM: AFIUM:
Cecilioides acicula (Mollusca)
Pyrrhidium sanquineum (Coleoptera)
Trichia hispida (Mollusca)
Udea ferrugalis (Lepidoptera)
ARACHIS: Trogoderma granarium (Coleoptera)
ARAUCARIA: Laspeyresia araucaria (Lepidoptera) ARBUTUS: ARBUTUS:
Evucheira socialis (Lepidoptera)
ARMORACIA:
Baris lepidii (Coleoptera)
ARTOCARPUS:
Anaballus amplicollis (Coleoptera)
Aspidiotus palmae (Homoptera)

Dacus dorsalis (Diptera) ASPARAGUS: Bradybaena similaris (Mollusca) Conoderus exsul (Coleoptera) ASPASIA: Vinsonia stellifera (Homoptera) ASTER: Haplothrips gowdeyi (Thysanoptera) BAMBOO: Asterolecanium miliaris miliaris (Homoptera) Asteroceanium mataris mataris (n Lyctus africanus (Coleoptera) Minthea rugicollis (Coleoptera) Neoadoxoplatys saileri (Hemiptera) Platypus rugulosus (Coleoptera) BAMBUSA: Asterolecanium bambusae (Homoptera) A. pseudomiliaris (Homoptera)
BARRINGTONIA: Ectomyelois ceratoniae (Lepidoptera)
BAUHINIA: Protopulvinaria pyriformis (Homoptera)
BEAUCARNEA: Lepidosaphes carinata (Homoptera)
BENINCASA: Pachybrachius albocinctus (Hemiptera) BETA: Arion ater (Mollusca)
Gnorimoschema occllatella (Lepidoptera)
Helix aperta (Mollusca)
H. aspersa (Mollusca)
Lixus junci (Coleoptera) Mamestra brassicae (Lepidoptera) BETULA: Eriophyes leionotus (Acarina) BRASSAVOLA: Orthalicus undatus (Mollusca) BRASSIA: Vinsonia stellifera (Homoptera) BRASSICA CHINENSIS: Mamestra brassicae (Lepidoptera)
BRASSICA OLERACEA VAR. BOTRYTIS:
Autographa gamma (Lepidoptera)
Cochlicella ventrosa (Mollusca) Helix aperta (Mollusca) Helix aperta (Mollusca)
Mamestra brassicae (Lepidoptera)
Milaz gagates (Mollusca)
Phytomyza rufipes (Diptera)
Pieris brassicae (Lepidoptera)
Theba pisana (Mollusca)
Udea ferrugalis (Lepidoptera)
BRASSICA OLERACEA VAR. CAPITATA:
Anacridium aegyptium (Orthoptera)
Arion hortensis (Mollusca)
Evergestis forficalis (Lepidoptera)
Helix aperta (Mollusca)
H. aspersa (Mollusca)
Limax marginatus (Mollusca)
Mamestra brassicae (Lepidoptera)
Milaz gagates (Mollusca)
Otala lactea (Mollusca)
Otalea melanopa (Coleoptera)
Pieris brassicae (Lepidoptera)
Theba pisana (Mollusca)
Trichia hispida (Mollusca)
Udea ferrugalis (Lepidoptera)
Vaginulus occidentalis (?) (Mollusca)
Vitrina diaphana (Mollusca) Mamestra brassicae (Lepidoptera) Vagnuus occaentaus () (Monusca)
Vitrina diaphana (Mollusca)
BRASSICA RAPA:
Ceutorhynchus pleurostigma (Coleoptera)
BRASSICA SP:
Lozostege bifidalis (Lepidoptera)
BROMELIAD: Acentroptera nerermanni (Colcoptera)
Althos obscurus (Hemiptera)
Ancylostomia stercorea (Lepidoptera)
Arion ater (Mollusca)
Arphnus melanotylus (Hemiptera)
Aspidiotus mendax (Homoptera)
A. palmae (Homoptera)
Atheas nigricornis (Hemiptera)
Chrysomphalus umboniferus (Homoptera)
Cryphula apicata (Ilemiptera)
Drymaeus alternans (Mollusca)
D. hegewischi (Mollusca)
Ethelema sobrina (Colcoptera)
Ezptochiomera tumens (Hemiptera) Acentroptera nevermanni (Coleoptera)

Hosts and Insects—Continued

CASSIA:

BROMELIAD—Continued
Galgupha punctifer (Hemiptera)
G. quadrisignata (Hemiptera)
Helicina oweniana (Y) (Mollusca)
H. zephyrina (Mollusca)
Lindomyrmez iniquus (Hymenoptera)
Limar marginatus (Mollusca)
Mecolaemus carvalhoi (Hemiptera)
Monanthia monotropidia (Hemiptera)
Nosutitermes ephratae (Isoptera)
N. nigriceps (Isoptera)
Oplomus nigripennis pulcher (Hemipter N. nigriceps (Isoptera)
Oplomus nigripennis pulcher (Hemiptera)
Orthalicus boucardi (Mollusca)
Pachybrachius albocinctus (Hemiptera)
Plagiodera punctigera (Coleoptera)
Pseudoparlatoria turgida (Homoptera)
Termatophylella fulvioides (Hemiptera)
Vaginulus occidentalis (Mollusca)
Zonitoides arboreus (Mollusca)
BROUGHTONIA:
Asterolecanium epidendri (Homoptera) Asterolecanium epidendri (Homoptera) Vinsonia stellifera (Homoptera) BUXUS: Eriophyes canestrinii (Acarina) CACTUS: CACTUS:
Amiter mes wheeleri (Isoptera)
Bulimulus hepatostomus (Mollusca)
Cryphula apicata (Hemiptera)
Gymnococcus aqavium (Homoptera)
Lepidosaphes philococcus (Homoptera)
Polygyra richardsoni (Mollusca)
Reticulitermes flavipes (Isoptera)
Sisamnes contractus (Hemiptera)
Yosemitia didactica (Lepidoptera)
CAESALPINIA:
Mimosestes sallaci (Coleoptera) Mimosestes sallaei (Coleoptera) CAJANUS: AJANUS:
Acanthoscelides armitagei (Coleoptera)
A. griscolus (Coleoptera)
Ancylostoma stercorea (Lepidoptera)
Callosobruchus analis (Coleoptera)
Fundella pellucens (Lepidoptera)
Maruca testulalis (Lepidoptera)
Sphenarches caffer (Lepidoptera)
Transferma granging (Coleoptera) Trogoderma granarium (Coleoptera)
CALADIUM:
Vaginulus occidentalis(?) (Mollusca)
CALLISTEPHUS: CALLISTEPHOS:
Taeniothrips atratus (Thysanoptera)
T. ericae (Thysanoptera)
Thrips major (Thysanoptera)
CALLUNA:
Aphis callunae (Homoptera)
Lygus rayulipennis (Hemiptera)
Orthotylus ericetorum (Hemiptera) Orthoguis ericae (Homoptera)
Rhinocola ericae (Homoptera)
Taeniothrips atratus (Thysanoptera)
T, ericae (Thysanoptera)
CALOCA RPUM:
Anastrepha serpentina (Diptera)
CALOTROPIS: Taeniothrips hawaiiensis (Thysanoptera)
CAMELLIA: CAMELLIA:
Aleurotrachelus camelliae (Homoptera)
Fiorinia theae (Homoptera)
CANAVALIL:
Lampides boeticus (Lepidoptera)
Maruca testulalis (Lepidoptera)
Taeniothrips vitticornis (Thysanoptera)
CAPSICUM:
Ceratitis capitata (Diptera)
Ephestia calidella (Lepidoptera)
Gnorimoschema borsaniella (Lepidoptera)
G audmannella (Lepidoptera) Gnormaschema obrsaniena (Lépid G. gudmannella (Lepidoptera) Ostrinia nubilalis (Lepidoptera) Platynota rostrana (Lepidoptera) Prodenia litura (Lepidoptera) Sterrha inquinata (Lepidoptera) CARICA: Dacus dorsalis (Diptera) Toxofrypana curvicauda (Diptera)
CARISSA:
Pulvinaria psidii (Homoptera)
CASIMIROA:

Anastrepha ludens (Diptera)

CASSIA:
Aganactesis indecora (Lepidoptera)
CASTANEA:
Curculio elephas (Coleoptera)
C. nucum (Coleoptera)
Helix aspersa (Mollusca)
Heterogenea asella (Lepidoptera)
Laspeyresia splendana (Lepidoptera)
CATTLEYA:
Asterolecanium epidendri (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Curytoma orchidearum (Hymenoptera)
Puto ulter (Homoptera)
Vinsonia stellifera (Homoptera)
CEDRUS: CEDRUS: Cochlicella ventrosa (Mollusca)
CEPHALOCEREUS: Lepidosaphes philococcus (Homoptera)
CERATONIA: CERATONIA E Ectomyelois ceratoniae (Lepidoptera) CHAMAEDOREA: Amnestus uhleri (Hemiptera) Chrysomyhalus sphaerioides (Homoptera) Helicina zephyrina (Mollusca) Lozostege similalis (Lepidoptera) Locostege similatis (Lepidoptera)
Parisoschoenus flavolimbatus (Coleoptera)
Parisoschoenus flavolimbatus (Coleoptera)
Veronicella moreleti (Mollusca)
CHRYSANTH EMUM:
Cleistolophus similis (Coleoptera)
Conotelus mezicanus (Coleoptera)
Frankliniella formosae (Thysanoptera)
Fr. schultzei (Thysanoptera)
Fr. williamsi (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
Lugus lineolaris (Hemiptera)
Ostrinia nubilalis (Lepidoptera)
Stephanitis nashi (Hemiptera)
Taeniothrips hawatiensis (Thysanoptera)
Tetranychus cinnabarinus (Acarina)
Thrips flavus (Thysanoptera)
T. imaqinis (Thysanoptera)
T. imaqinis (Thysanoptera)
CEroplastes rubens (Homoptera) Ceroplastes rubens (Homoptera) Ancylostomia stercorea (Lepidoptera)
CICHORIUM: Helicella itala (Mollusca) CINNAMOMUM: Trogoderma granarium (Coleoptera)
CITRULLUS: Heterotermes maculatus (Isoptera) Jadera rufofusca (Hemiptera) CITRUS AURANTIFOLIA: Aleurocanthus woglumi (Homoptera) Aleurocantius wogiumi (Homoptera)
Anastrepha ludens (Diptera)
Chrysomphalus personatus (Homoptera)
Morganella longispina (Homoptera)
Paragonatus divergens (Hemiptera)
Parlatoria cinerea (Homoptera) Paragonatus divergens (Hemiptera)
Parlatoria cinerea (Homoptera)
P. zizyphus (Homoptera)
P. zizyphus (Homoptera)

Pratylenchus penetrans (Nematoda TRITICUM;

Leptos phaeria eustomoides (Ascomycetes) ULMUS:

Meloidogyne arenaria (Nematoda)

VANDA: Phyllostictina pyriformis (Deuteromycetes) VIBURNUM:

Meloidogyne hapla (Nematoda)
†M. javanica (Nematoda)
VITIS:

‡Elsinoe ampelina (Ascomycetes) YUCCA:

YUCUA:
†Strickeria obducens (Ascomycetes)
ZANTEDESCHIA:
Meloidogyne incognita (Nematoda)
†M. incognita acrita (Nematoda)
M. javanica (Nematoda)
ZEBDINA (Personatoda) ZEBRINA:

Meloidogyne incognita (Nematoda) ZELKOVA:

‡Fusarium larvarum (Deuteromycetes)
ZINGIBER:

i Meloidogyne arenaria (Nematoda)
M. incognita acrita (Nematoda)
M. javanica (Nematoda)
i M. javanica (Nematoda)
i M. javanica javanica (Nematoda)
Radopholus similis (Nematoda)
ZINNIA:

†Alternaria zinniae (Deuteromycetes) ZYGOPETALUM:

Uredo guacae (Promycetes) U. oncidii (Promycetes)

Hosts Unknown

GRASS: †Phyllachora graminis (Ascomycetes)
ROOTS:

†Pythium intermedium (Phycomycetes)
†P. mamillatum (Phycomycetes)
†P. salpingophorum (Phycomycetes)

†P. ultimum (Phycomycetes) SUCCULENT:

Meloidogyne arenaria (Nematoda) WOOD: †Hypoxylon marginatum (Ascomycetes)

A dagger (†) indicates a first interception from the country of origin. A double dagger (‡) indicates a first interception by Division inspectors.
